THE MIDDLE EAST.**

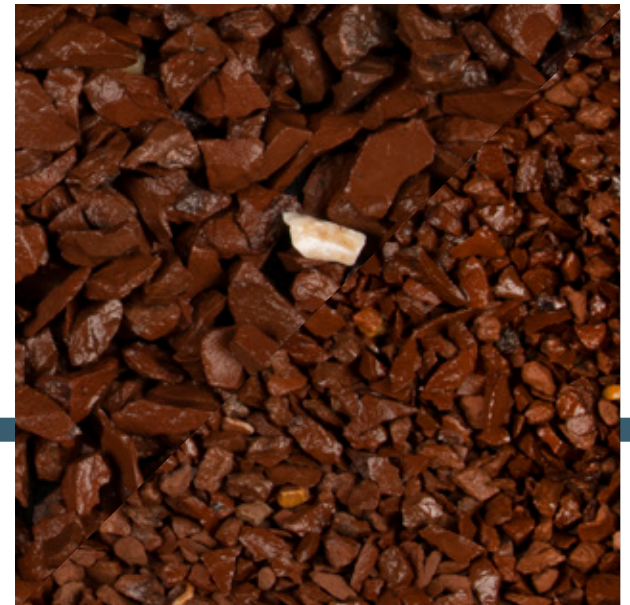

MARBLE CHIPS

Marble chips is one of the most widely used natural stones in different countries. Marble Chip is used in various spaces which includes: landscaping, facade, gardening, interior and exterior designs. Some of the advantages of using this type of natural stone are as follow:

1. Longer durability
2. No change in color due to climate change
3. No change in quality due to any weather conditions
4. No need to polish
5. Great compatible price compare to tile or slab
6. Easy transportation
7. No breakage
8. Vast color and size availability.

This type of Natural Stone is manufactured in 3 of Galaxy Stones Group's marble chips facility in variety of colors and sizes with over 100,000 tons of annual production.
